Nov 7	Draft of demos and figures
Nov 14	Final draft of demos and figures
Nov 21	Draft of report
Nov 28	Presentations and demos
Dec 5	Final report

Discussion / Difficulties

We have a encounter one difficulty that we is compromising our work. There seems to be a problem with our code for the search of twitter. We have asked some external help and hope to be helped soon. For some reason we cannot look for tweet on a specific day except the current day. I hope we will overcome that problem soon or we will have to change our work because of that. If we don't find a solution we could stay on the same topic but maybe try to gather the information through the API of important newspaper.
